

I support media diversity

I strongly believe that the FCC should retain all of the current media ownership rules now in question. These rules serve the public interest by limiting the market power of already monopoly companies in the broadcast industry.

I believe that the studies commissioned by the FCC purposely distort, and minimize the negative affects media deregulation and consolidation have had on media diversity. Sure hundreds of Channels, and Radio stations, All owned by 5 corporations! This is not diversity, or "Free Market"!

Our forefathers believed that democracy was best served by a diverse marketplace of ideas. This has already been defeated by the giant Media corporations that serve Only their own Profits. This is proven by the fact that not one of the major media have given the public even a hint of the too soon, impending action on these deregulations.

The public interest will best be served by preserving media ownership rules in question in this proceeding. And at the very least give the public the exact changes, and information that these proceedings are even occuring. Gov. by the people, and For the people, and Of the people, says you must.

In addition to the official hearing on this matter in Richmond, VA, I strongly urge the FCC to hold additional hearings elsewhere around the nation to solicit the widest possible participation from the public which will be the most directly affected by the outcomes of these decisions. I think it is important for the FCC to not only consider the points of view of those with a financial interest in this issue, but also those with a social or civic interest.

With the serious impact these rule changes will have on our democracy, it is incumbent on the Commission to take the time to review these issues more thoroughly and allow the American people to have a meaningful say in the process.

Further, as proof that the Media, and Gov. agencies are not serving the public interest. Hunger kills about 20,000 people each day, amidst plenty, and amidst easily affordable ecological solutions. Please get some understanding of the magnitude of this dangerous injustice, from these figures, and get motivated to be helpful effectively, untill hunger's done. The purposely not prevented tragic attacks on 9-1-1 killed 3,000 innocent people. Hunger kills that many people about six and one-half times -- Each Day. Hunger has been cut in half in the past 20 years, but our Gov, and Media, have basicly ignored it. The whole world could be enjoying complete Freedom from hunger by now, for about what we used to subsidize a few mega rich corporations, when we invaded Iraq instead, of ending hunger. Luckily, I'm informed, and no one can tell me that any other priority, for action, and spending/Sharing, can or will create more security, and better economy, and more happiness, than ending hunger completly, as soon as has been possible for at least 5 years already. Do the math. How many millions of innocent people have been starved to death by mistaken, missinformed, priorities in the last five years?

so, no more drastictness is called for, IF people are informed, and IF you, and others act on this information helpfully. Look at all the action the 9-1-1 attacks brought about. You can't tell me truthfully that hunger

doesn't deserve some modest amount of such action, for the betterment of all.

Much planet Healing Love and Truth, Toward Paradise Earth Free from hunger, at peace, and unpolluted, and with Truly diverse Free Press.  
Thank You, Sincerely, and Respectfully,

Thank you, Todd Feiler
